88h Now, I’d like your opinion on a new service that might be offered in the Washington area – that is, an instant carpool service that would make it easy for you to arrange to share a ride for a single trip on short notice. Registered members who want to share a ride would post a request to a Smart phone-accessible application. Other members would be notified of requests through email or texts and could respond for rides they are willing to share.

If a service like this was available in the region and drivers were paid $0.20 per mile when they provide a ride, how likely would you be to use it when you are the driver? Would you be ...very likely, somewhat likely, or not likely to use it?

1 Very likely
2 Somewhat likely
3 Not likely
